**Addendum NO. 1**

To Bid Documents  
Able Park Playground  
Project A: Rehab Installation  
And  
Project B: Replacement and Installation

The attention of all bidders submitting proposals for Able Park Playground Project A: Rehab Installation and Project B: Replacement and Installation is called to the following addenda to the specifications and plans.

The following changes, additions, and/or deletions shall be made to the Bid Request for Able Park Playground, on which proposals will be received on/or before Wednesday, February 14, 2024 by 2:30pm.

Please be sure to acknowledge this addendum on page 17.

I. Corrections/additions/deletions

Page 17 – Performance Bond change:  
Not required

Page 17 – Specifications dated:  
Date should read: 1/17/2024

II. The following Questions have been received by the City. Responses are being in provided.

1. When you say “(2) Adaptive Swings”, do you want both of these to be inclusive/ADA swings or would you prefer (1) tot swing and (1) inclusive swing/ADA?
  - One with molded seat with belt options for 2-12 years old. The other tandem swing with bucket seat.

2. The pour-in-place pathways — what is the purpose of these? Is it to create a pathway to the transfer station, to be at the base of an event such as a slide also? Could you provide a little more information as to their reasoning/placement requirements?

- There is an existing structure that will require PIP at the base for the slide. The other placements are for transfers or for slide option on a 2-5 year old structure.

3. For the 2-5 structure's canopy, is there a material you do or do not want to see for this? i.e. fabric vs plastic vs steel.

- Preferred plastic and does not need to cover entire structure but enough to provide some shade.

4. Are we able to submit more than 1 design for the project?

- Yes

**End of Addendum NO. 1**
